

PRODUCT DATA SHEET

WH-2 Weighting Spacer Agent**Product Description**

WH-2 is a dusting agent that made of some high active surface active agents, suspending agent, weighting agent, thinner and the others addition agents.

Characteristics

- Suitable temperature: 25°C~150°C (BHCT).
- WH-2 is a free flow powder, non-poisonous, non-odor, and non-corrosive.
- WH-2 can confect different density dusting agents among 1.0~1.9g/cm³, it also washing the wall of well effectively.
- WH-2 has good compatibility with cement slurry, can dilute cement slurry effectively and improve the performance of cement.

Technical Specification

Items	Specification
Appearance	Flowbility powder or particles
Water content, %	≤10.0
Fineness (0.425mm sieve), %	≤10.0
Initial consistency , Bc	≤30.0
Thickening time, min/80°C, 46.5MPa, 45min	≥60.0
Density difference, g/cm ³	≤0.05
Compression strength, MPa/80°C, normal pressure, 24h	≥7.0

The ingredient of the cement in the table is: JiaHua G class: cement, pre-made dusting agent: 5%, W/C: 0.44, water quality: tap-water (BWOC).

Packing, Storage

- Sacked with three-layer plastics bag, 25kg per bag.
- Be kept away from moisture and possible damage of the packages in transportation.
- Storage life time is two years.
