140X210MM

CHOKING RESCUE DEVICE

Essential Rescue Device For Choking Emergency

HANDLE
Easy to use by every body.

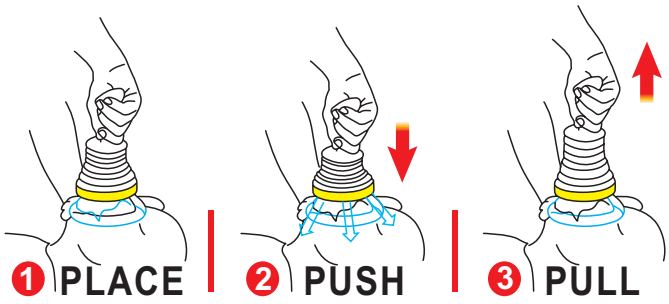

PLUNGER
Generate negative pressure,
more powerfully suck out obstructors.

VENT VALVE
Discharge air from main body to
ensure it can generate strong suction.

FACE MASK
Super soft facemask, gentle to skin
and no worry of skull trauma.
Includes:
- One Adult Mask
- One Pediatric Mask

Easy to Use in a Choking Emergency

1 PLACE
Place the mask over the victim's nose and mouth. Hold the mask with your weak hand to make a good all-around seal on the victim's face.

2 PUSH
Push the plunger down with your strong hand, all air will escape out of the one-way valve system preventing an obstruction from being pushed further into the victim.

3 PULL
Pull back on the plunger while holding the mask in place. This will create suction.
If the obstruction does not come out on the first pull, continue to push, and pull the plunger without removing the device from the victim's face.
