

Assembly Instructions

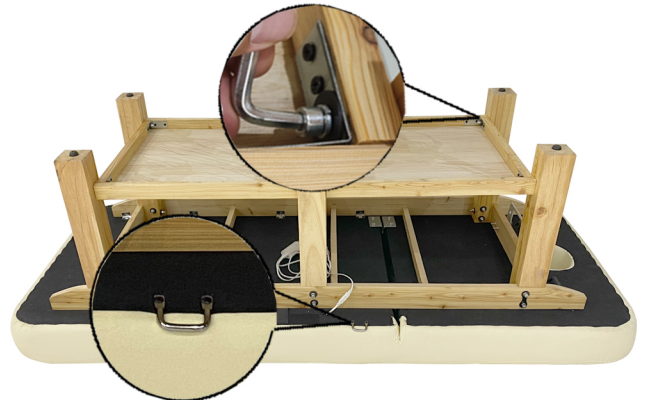

Parts List

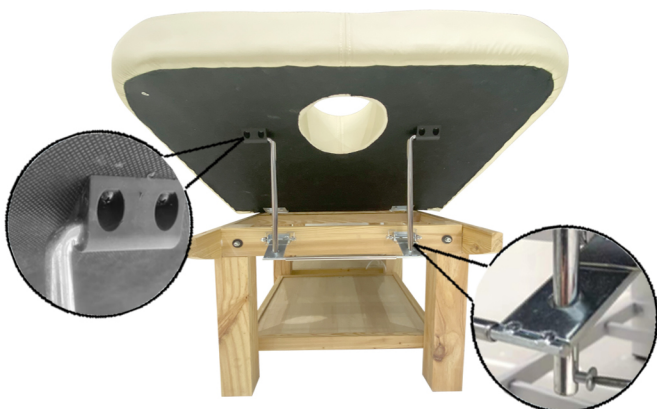

Step 1: Sequentially thread the washers (9, 11) onto the long screws (7). Install the two side bed legs (3) onto the bed frame (1). Sequentially thread the washers (9, 10) onto the long screws (7). Install the middle bed leg (3) onto the bed frame. (Note: the nut direction for the bottom of the bed legs is different for the middle and side bed legs.) First, thread the washers (10, 9) on the inner side, then install the nut. Do not tighten the screws yet.

Step 2: Sequentially thread the short screws (8) with washers (9, 10). Install the storage shelf (2) onto the bed legs, and tighten the storage shelf screws. Use the Ushaped handle hooks on the bed surface, attaching them in the opposite direction with screws (6).

Step 3: Stand the bed upright. Insert the short side of the branch (4) into the plastic part on the back, and insert the long side into the hole of the metal part of the bed frame. Then, use the matching screw to tighten it into the screw hole at the bottom of the branch.

Step 4: Use the wrench (6) to tighten all the screws on the bed legs, and place the pillow (5) on the bed.
