

2 Channel GPS Anti Drone Device

User manual

Thank you for using this 2-band GPS anti-drone device.

In order for you to operate the equipment as quickly as possible, we are equipped with a detailed user manual, from which you can obtain the product introduction, use methods, system Settings and safety precautions and other aspects of knowledge.

We are very careful and rigorous in the preparation of this manual, and believe that the information provided in the manual is correct and reliable, but there will inevitably be mistakes and omissions, please kindly bear with us and warmly welcome your correction.

Disclaimer:

Before using this product, please read the relevant operation instructions and this statement carefully to ensure the correct use of the product. Failure to follow or use this product in accordance with the instructions and precautions herein may result in product damage and other risks. Some contents of this document are subject to change as the product hardware is upgraded and are subject to change without prior notice.

By starting to use this product, the user shall be deemed to have approved and accepted all contents of this Statement. This product is strictly forbidden to disassemble.

1.Product characteristics

- (1) The product is small and easy to install.
- (2) Pole or hanging installation (customized according to customer requirements)
- (3) Customized omnidirectional fiberglass antenna, good anti-interference performance.
- (4) The interference distance is far
- (5) The bottom heat dissipation tooth heat dissipation plus heat dissipation fan.
- (6) Single key switch technology, control power output.
- (7) Power supply AC110-250V/DC24V, can be customized.
- (8) Waterproof class IP65

Package List:

1. Product host *1
2. Power cable *1
3. Omnidirectional antenna *2
4. Remote control *1
5. A set of pole support
6. Airline case *1

Product show:

Product parameters:

Name	GPS jammer	Custom	support
Channel	1.5G (1150-1620MHz) 100W 1.2G (1220-1230MHz)100W	Function	gps interference
Cover radius	≤ 10km	Output power	200W
Weight	21KG	Size	44 * 35 * 26.5 CM
Voltage	220V to DC 29.4V	Place of use	Army, National defense, military, armed police, transportation, large venues air defense, etc
Base	Vehicle suction cup mounted	Blocking medium	Electromagnetic wave
Packing method	Flight case	Package size	65 * 45 * 35 cm

Frequency band description:

- (1)Drone crash landing: open 1.5G, 2.4G, 5.8G;
- (2)Drive away the drone: Open 2.4G, 5.8G.
- (3)Forced landing UAV: Open 900mhz, 1.5G, 2.4G, 5.8G
- (4)400mhz is the remote control band for domestic drones, as well as our common TV remote controls, car keys, children's toys, etc.
- (5)900mhz is a commonly used remote control frequency band for industrial drones, custom drones and large drones.
- (6)1.2G is China's self-developed Beidou navigation system, which will also be used in the UAV industry in the future. As the second positioning system of 1.5G (GPS), it will be used in the future.

4. Application scenario

Forbid "black fly" to be the guardian of low altitude security.

With the rapid increase in the number of civilian drones, the number of various "black flight" incidents has also risen rapidly. The company's products are mainly used in venues, high-speed railway stations, military bases, major government

conferences, prison management, petrochemical industry, border defense, breeding bases and cultural and sports activities.

Airport

Rail station

Military base

Major conference

Prison

Petrochemical industry

Frontier defence

Breeding base

Activities

5. Matters needing attention

- (1). The equipment should be installed in a high space without shelter, and avoid high-voltage lines and electromagnetic wave interference as far as possible
- (2). Check the battery level before using the device, and charge it first if it is less than 40%.
- (3). The warranty period is 12 months, which guarantees the operability of the product and promises to carry out warranty maintenance in case of failure during the warranty period, provided that the consumer complies with the conditions of operation, transportation and storage.
- (4). We reserve the right to make changes to the product design in order to improve its technical characteristics and reliability.
- (5). in outdoor use, should pay attention to the waterproof effect, but also to avoid exposure to the sun, when using the direction of the drone, the best effect.

This product is suitable for places where drones are prohibited to fly!
