

Global Artificial Intelligence Robot (GAR)

Introduction

What is GAR?

The Global Artificial Intelligence Robot (GAR) platform, led by the Global Artificial Intelligence Robot Society (GARS), is a premier global ecosystem empowering youth aged 5–18 through integrated AI/robotics education, cross-cultural exchange, and international perspective development. Key initiatives include multinational STEM-cultural exchange program, immersive global innovation center tours study with cultural experiences, and an international robotics competition culminating in a World Championship. Together, these foster globally conscious innovators who leverage technology to bridge cultures and drive positive change.

Development of GAR

Development of GAR

Mission and Vision

GAR Mission:

GAR empowers youth aged 5–18 as global innovators and cultural ambassadors by integrating AI/robotics education, cross-cultural exchange, and international perspective development. Through multinational STEM-cultural programs, immersive global innovation tours, and competitive robotics platforms, it equips youth with technological fluency, intercultural competence, and ethical leadership—enabling them to drive positive change as proactive changemakers in an interconnected world.

GAR Vision:

GAR aspires to be the world's leading youth-driven platform, merging cutting-edge technology with cross-cultural collaboration to empower adolescents as future-ready leaders. It envisions a future where youth harness AI/robotics to bridge cultural divides, advance scientific innovation, and champion sustainability, redefining their role from learners to global architects of progress and equity.

GAR Members System

GAR National Representative

Level: National

Right: authorized to hold national-level, cross-provincial, provincial, and city-level competitions or events

International: organizing, co-organizing, or arranging teams to participate in international competitions or events

GAR Premier Partner

Level: Provincial

Right: authorized to hold cross-provincial, provincial, and city-level competitions or events

International: organizing, co-organizing, or arranging teams to participate in international competitions or events

GAR Certified Partner

Level: City-level

Right: authorized to hold city-level competitions or events

International: arranging teams to participate in international competitions or events

Multinational Exchange Program

Multinational Exchange Program bring together students globally through online or onsite platforms. Participants explore diverse cultures, STEM knowledge, and collaborative projects using robotics kits. The program keeps expanding as more countries and innovative tools join the initiative.

Program Models:

- Online: 1-hour sessions
- Onsite: 2-hour sessions

Participant Categories:

- Kindergarten
- Primary School
- Junior Middle School
- Senior Middle School

Team Formation:

- Students from different countries/regions collaborate per team.

Case Study 1

On July 25, 2025, the first GAR International Online Exchange Class was successfully held between kids aged 5-9 from Malaysia and Lebanon.

GAR 2025 International Online Exchange Class

TIME: July 25, 2025

For Malaysia: 3:00-4:00 pm For Lebanon: 10:00-11:00 am

Global Study Tour

Global study tours provide hands-on technology experiences in global innovation hubs. Participants engage with prestigious universities, R&D centers of leading tech corporations, national laboratories, science museums, research institute and cultural landmarks showcasing technological heritage. Future expansions will feature more distinctive destinations worldwide, offering expert-led workshops at cutting-edge facilities, cross-cultural exchanges with international peers, and immersive experiences blending STEM and humanities.

Program Models:

- Global Study Tour
- GAR competition + Global Study Tour

Participant Categories:

- Primary School
- Junior Middle School
- Senior Middle School

Study tour places:

- Top Rank University
- R&D centers of tech corporations
- National lab, science museum
- Research institute
- Cultural landmarks

Case Study 4

GAR 2025 Asian Open Study Tour Highlights

On January 20, 2025, in conjunction with the GAR 2025 Asian Open, the Global Artificial Intelligence Robot Society (GARS) organized an immersive study tour in Singapore, where students from China, the Philippines, Malaysia, Singapore, and India explored cutting-edge facilities at the National University of Singapore (NUS) and Google's offices and labs. The experience provided firsthand exposure to world-class academic research and innovative high-tech products, fostering cross-cultural collaboration among young STEM enthusiasts.

Case Study 5

As part of the GAR 2025 China International Open and Study Tour, GARS organized study visits to Zhejiang University's Yuquan Campus and Huzhou Institute on August 16 and 18, 2025, followed by a trip to Nanxu Ancient Town. Participants from China and the Philippines joined these educational experiences.

International Robotics Competition

GAR International robotics competition provides students with a diverse competitive platform through original events. (e.g. GAR 2025 Asia Open, GAR 2025 China International Open, GAR 2025 World Championshi, GAR 2026 Asian Open) and partner events (e.g. National Youth ICT Competition, Guangxi Beibu Gulf AI Education Competition).

Program Models:

- GAR National/Regional Competition
- GAR International Open
- GAR World Champion

Participant Categories:

- Kindergarten
- Primary School
- Junior Middle School
- Senior Middle School

Contests:

- Version A-Primary, Junior/Senior middle
- Version B-Kindergarten, Primary
- Invention-Primary, Junior/Senior middle

Online/Onsite Invention Contest

Case Study 6

On January 18, 2025, the GAR 2025 Asia Open took place in Singapore, attracting hundreds of talented students from China, the Philippines, Malaysia, Singapore, and India to compete with peers from across the globe.

Case Study 7

On August 17, 2025, the GAR 2025 China International Open was held in Hangzhou, China, bringing together hundreds of talented students from China, Macao-China, the Philippines, Malaysia, Singapore, Lebanon, and South Korea to compete on an international stage.

Case Study 8

On December 7, 2025, the GAR 2025 World Championship Contest was successfully held at the MyFIRST Robotics Centre in Seremban, Malaysia. The event brought together talented young participants from multiple countries including Malaysia, the Philippines, Kyrgyzstan, China, Lebanon, Saudi Arabia, Thailand, Singapore, and Turkey for a full day of technological innovation, friendly competition, and meaningful international exchange.

Case Study 9

From April 9 to May 9, 2026, the first GAR 2026 International Online Invention Challenge Contest is organized by Global Artificial Intelligence Robotics and teams from Philippines, Vietnam, Malaysia, Saudi Arabia, Kazakhstan attend this contest and share their talent in the world stage.

Case Study 10

From July 24 to 28, 2026, the GAR 2026 Asian Open Contest with Multinational Exchange Program & Study Tour was successfully held in Macao, China. Organized by the Global Artificial Intelligence Robot Society (GARS), the event brought together hundreds of young participants from multiple countries and regions, including Macao, China; the Philippines; Kazakhstan; and other countries and regions. Participants came from primary school, junior middle school, and senior middle school levels.

GAR 2026 Season

No.	Contest	Type	Location	Time	Organizer
1	GAR 2026 International Online Invention Challenge Contest (1st)	International Open	Online	April 9 to May 9	GARS
2	GAR 2026 Kazakhstan National Contest	National	Kazakhstan	May	GARS Kazakhstan Organizer
3	GAR 2026 Philippines National Contest	National	Philippines	June 22-25	GARS Philippines Organizer
4	GAR 2026 Asian Open	International Open	Macao, China	July 24-28	GARS
5	GAR 2026 International Online Invention Challenge Contest (2nd)	International Open	Online	September-October	GARS
6	GAR 2026 MENA Open	International Open	Saudi Arabia	November	GARS + GARS KSA Orgnaizer
7	GAR 2026 World Championship	World Championship	Shanghai, China	December 3-7	GARS

> Second Round

 www.nashenbot.com |  gar@nashenbot.com |  NASHENBOT

Thank You

A wireframe hand, composed of white lines and blue dots, reaches upwards from the left side of the image, its index finger pointing towards a glowing blue orb. On the right side, a robot head is shown in profile, looking upwards. The head is metallic and has a large, circular, glowing blue eye. A network of blue lines and dots is overlaid on the head, suggesting a digital or neural network. The background is a soft-focus cityscape with various buildings and a traditional Chinese-style building in the center.
