

****Notes:****

1. The silo capacity is based on cement (with a specific gravity of 1.35 t/m³).
2. In accordance with national standards, the metering range meeting the dynamic accuracy is from not less than 30% of the full scale to within the full scale.
3. The normal operating ambient temperature of the concrete batching plant is 1 ~ 40°C.

Admixture Weighing Range and Accuracy (kg): (1~20)±1%
