

Plasma Surgical System

Central Control Unit

- Equipped with an intelligent integrated medical touch screen, featuring a user- friendly operation interface.
- Suitable for a wide range of departments and indications.
Superior compatibility: It is compatible with multiple manufacturers and multiple types of electrodes.
- High-precision and controllable performance enables. Efficient cutting and ablation, effectively minimizing surgical trauma and bleeding risk.
- Intelligent lifespan detection: Insert the electrode, and it automatically detects the remaining lifespan of the electrode. Multi-gear foot pedal adjustment: Facilitates surgeon's operation during procedures.

Foot pedal

- Metal casing with impact resistance, service life exceeding 500,000 cycles, and IP68 waterproof rating .
- Large pedal design to reduce the risk of accidental touch.

Disposable Plasma Surgical Electrode

- Used with intra-articular endoscopes, soft tissue ablation, excision, and coagulation.
- Comprehensive specifications and modes, compatible with various Mainstream plasma surgical systems, meeting different needs from different hospital departments.
- Plasma technology: Significantly improves work efficiency and shortens surgical duration.
- Low heat generation to avoid thermal damage.
- Built-in suction channel ensures a clear field of vision.

Electrode types

	Model	Specification (mm)	Suction tube	Injection tube
	JWAI026	$\Phi 3.8 \times 120$ 90°	Yes	No
	JWAI027	$\Phi 3.8 \times 140$ 90°	Yes	No
	JWAI028	$\Phi 3.8 \times 160$ 90°	Yes	No

	Model	Specification (mm)	Suction tube	Injection tube
	JWAI038	$\Phi 2.9 \times 120$ 30°	No	No
	JWAI039	$\Phi 2.9 \times 140$ 30°	No	No
	JWAI040	$\Phi 2.9 \times 180$ 30°	No	No

	Model	Specification (mm)	Suction tube	Injection tube
	JWAI013	$\Phi 4.5 \times 160$ 30°	Yes	Yes
	JWAI014	$\Phi 4.5 \times 190$ 30°	Yes	Yes
	JWAI015	$\Phi 4.5 \times 210$ 30°	Yes	Yes
	JWAI018	$\Phi 3.8 \times 160$ 30°	Yes	Yes
	JWAI019	$\Phi 3.8 \times 190$ 30°	Yes	Yes
	JWAI020	$\Phi 3.8 \times 210$ 30°	Yes	Yes
