E-ink Display [7.5-inch Aluminum Alloy Frame]

VM-BD902

Functional description:

1. The equipment features an all-aluminum construction, utilizing premium aluminum alloy with CNC precision machining. The surface undergoes anodized treatment for a lustrous finish, compatible with processes such as sandblasting and brushing.
2. Screen Color: Dual-sided electronic ink display with three colors (black, white, red);
3. Screen size: 7.5 inches, Glass: Ultra-clear glass + chemically tempered;
4. Supports NFC image transfer to the center of the display via mobile phone;
5. Supports batch/individual downloads and one-click import: One-click import of attendee lists, batch association, seat selection, and import; supports batch downloading and distribution of materials.
6. Supports uploading images via mobile Bluetooth connection;
7. Battery Life: Equipped with a built-in AA alkaline battery, it can operate for up to one year on a full charge.

Technical Specifications:

Model	VM-BD902
Resolution	800x480
Operating frequency	Bluetooth: 2.4–2.485 GHz
Communication rate	5.4 KB/S
Batty endurance	1 year
Battery	Built-in 5AA batteries
Screen size	7.5 inches
Weight	528.9g
External Dimensions	208 *149.4*44 mm
