Key Function Description:

Bluetooth Multi-Functional Button: Hold this button to turn on the Bluetooth function. After turning on, the blue LED light starts to flash, indicating entry into the connectable state. Once successfully paired with a mobile phone, the blue LED light stays on. If the Bluetooth function is already on, long press this button to turn it off.

Functional description:

1. Suitable for 60-square-meter meeting rooms with up to 25 participants.
2. Equipped with a USB interface and a 3.5mm microphone input/output interface, supporting Bluetooth connection to mobile phones.
3. Three high-sensitivity omnidirectional microphones provide 360-degree full-range audio pickup, with an optimal pickup distance of 6 meters.
4. Acoustic Echo Cancellation (AEC) technology effectively eliminates acoustic echoes.
5. Noise cancellation technology effectively reduces indoor and surrounding environmental noise.
6. USB connection to computers is applicable for software video conferences, distance education, small-scale telephone conferences, etc., supporting Windows XP, Windows Vista, Windows 7, iOS and other operating systems.
7. Advanced DSP (Digital Signal Processing) technology ensures the most authentic transmission of meeting content.
8. Built-in lithium battery.

Technical specifications:

Model	VM-V8000L
Supported Systems	Windows XP/ Windows Vista/ Windows 7/8/10, etc.
Interface	USB version 2.0
Maximum Speaker Volume	93dB
Speaker Output Frequency	30-16KHz
Microphone Input Frequency	30-16KHz
Power Supply	5V DC
Product Dimensions	326x285x65mm
Product Weight	1.53kg
Operating Temperature	5℃-40℃
Accessories	USB Cable/ User Manual/ Felt Bag/ Packaging Carton
