

Function Description::

- 1.Supports manual and automatic switching between director mode and recording mode;
 - 2.Supports one-click control for recording/live streaming start, stop, and director functions;
 - 3.The 18-key control allows seamless switching between any channels of the recording view and backup (preset) view, making switching between recording views simple and easy to operate.
 - 4.Supports at least ten special effects including fade-in/fade-out, picture-in-picture, multi-screen layouts, erase, zoom, and vertical scrolling; changes and switches recorded footage with a single button press.
 - 5.Embedded preset buttons enable switching between camera lenses. During recording, preset scenes can be configured in advance using the preset function.
 - 6.Provide a joystick for controlling the pan/tilt position and zoom;
 - 7.Pan-tilt micro-control: Achieve remote pan-tilt zooming in and out through the director console's zoom functions.
 - 8.Integrated with the recording system, it simplifies the recording process and delivers vivid visuals.
- The director interface corresponds synchronously with the director console buttons/status;

Technical specifications:

Model	LB-8622T
Director's View	9 Channels
Standby (Pre-set) Screen	9 Channels
Volume Control	Support
Full-color buttons	Not fewer than 46
joystick	3D Hall Effect Joystick
Interface	RS232-DB9 interface, DB25 pin interface
Network port	RJ45 port*1
USB	USB*1
Power Supply	DC12V
Power consumption	< 5W
Product Dimensions	348.7mm*178mm*45mm
Weight	1.6Kg
