

Compact Size. Powerful Sound. Smart Connection.

The **VOKON VM-TW4021D** is a compact active full-range speaker designed with a stylish appearance, powerful audio performance, and flexible connectivity.

Featuring a customized private mold design, built-in high-performance amplifier, and **TWS wireless stereo technology**, it delivers clear and balanced sound for commercial and personal audio applications.

Key Features

1. Powerful Full-Range Sound

4×2" Full-Range Drivers + 1×3" Tuning Speaker

Provides clear highs, natural mids, and rich bass performance for an immersive listening experience.

2. High Performance Output

60W RMS / 120W Peak Power

Built-in **80W RMS amplifier** delivers powerful sound with low distortion and excellent audio clarity.

3. TWS Wireless Stereo Technology

Supports wireless connection between two speakers within **20 meters**, creating a true stereo sound experience without complicated wiring.

4. Compact & Stylish Design

Customized private plastic mold with a slim and elegant appearance.

Available in **black and white housing options** to match different environments.

5. Easy Installation & Flexible Application

Compact structure and convenient installation design make it suitable for various commercial and residential applications.
