

Product Overview

VL-706/VL-708 series horn speaker delivers reliable public address performance with rated power of 15W to 30W and 100V constant voltage input. It features high sensitivity at $105\pm 3\text{dB}$. Constructed with durable ABS housing, the unit reaches IP66 waterproof grade, perfectly adapting to various outdoor environments. With compact dimensions and lightweight design in standard white finish, it enables easy installation. Suited for broadcasting, security notification and industrial paging, this loudspeaker offers stable audio output and long service life for outdoor PA systems.

Suitable for applications including:

- ✓ Outdoor Public Broadcasting
- ✓ Industrial Parks
- ✓ Ports & Docks
- ✓ Campus Announcement Systems
- ✓ Scenic Spots
- ✓ Residential Communities
- ✓ Roadside Security Paging
- ✓ Farmland & Pasture Zones
- ✓ Parking Lots
- ✓ Transportation Hubs

Key Features

- 1. Rated power: 15W–30W with 100V constant voltage input, compatible with standard public address systems.
- 2. Boasting high sensitivity of 105±3dB, it reproduces crisp, far-projected speech audio suitable for long-distance broadcasting.
- 3. Constructed with an IP66 waterproof ABS enclosure, it features excellent weather resistance for year-round outdoor deployment.
- 4. Lightweight design paired with an adjustable mounting bracket enables flexible adjustment of installation angles.
- 5. Finished in standard white, the unit has a streamlined look that blends well with diverse outdoor environments.
- 6. It delivers consistent acoustic performance with a low failure rate and extended service life.
- 7. Widely applicable for public address systems in campuses, industrial zones, scenic spots and residential communities.
