

Cryotherapy Chamber

(Luxury Style)

Model:uCyro L8

About Cryotherapy Therapy :

Ultra-low temperature cryotherapy is a non-invasive therapy that exposes the body to a cold therapy cabin at -100°C to -180°C . The temperature drop caused by the nitrogen vapor after the evaporation of liquid nitrogen stimulates the temperature sense in the human body, prompts the brain to send a signal, and returns the blood to the main organs of the human body, to promote the blood, nerve and other circulatory systems of the body and effectively improve the body. Various functions.

Continuous and short-term ultra-low temperature cold therapy on the user's epidermis can achieve rapid recovery of physical fitness, repair damage, enhance immunity, improve insomnia, relieve depression and other risks, and have effects such as weight loss and skin tightening.

Features :

- Anti-leakage protection function
- Precise temperature control function
- One-key emergency stop button in the cabin, personnel are safe and worry-free
- Oxygen concentration monitoring and nitrogen exhaust system
- The material inside the cabin is an ultra-low temperature conductive insulator
- Automatic silent lifting platform
- 1 minute fast start, the first pre-cooling only takes 2 minutes

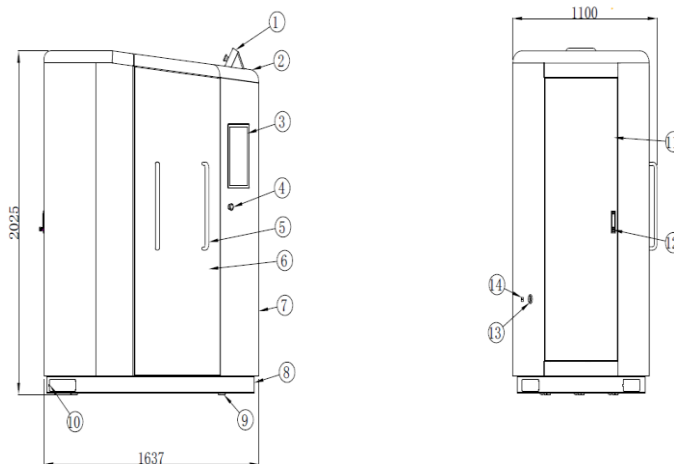

- Quick-drying function, it only takes 20 minutes to dry completely
- Support multi-model, multi-brand liquid nitrogen tank connection.
- Ambient light surround design, excellent experience
- Personalized cold therapy program

Specification:

About Cabin:

Index	Content
Model Name	uCyro L8
Dimensions	H2050mm*W1637mm*D1100mm
Weight Capacity	200KG
Height Limit	1500~1900mm
Temperature Range	-160~-110℃
Liquid nitrogen consumption	8L/Time
Lifting range of the platform	300mm
Power consumption	1.2Km
Working noise	<30db

main structure:

- ① secondary display ②interior ③main display ④Emergency stop switch
⑤handle ⑥door body ⑦chamber body ⑧Chamber base
⑨casters ⑩mobile forklift hole ⑪access door ⑫door lock
⑬liquid nitrogen Inlet ⑭power socket

Configuration List:

Index	Specification	Unit	QTY
Chamber	H2050mm*W1637mm*D1100mm	set	1
vacuum hose		set	1
power cable		set	1
Operation and Maintenance Manual		set	1
